

VARIO 555 eMA

Electronic Tape Dispenser
for gummed tape

Best suited for sealing permanently alternating box sizes...

... as well as serials of same box sizes.

THE NEW GENERATION

The HADE VARIO 555eMA has been totally re-designed from the inside out, while maintaining the integrity and reliability that made the original 555 an industry standard.

This brand new electronic gummed tape dispenser offers the operator 14 preset choices from 15-145cm - with the push of a button. Within the automatic mode up to 3 lengths can be saved and dispensed in a row. Additionally tape lengths can be adjusted by special function keys.

Large repeat key to dispense last length. Random length key to allow tape to be dispensed at any length.

As an option there is a foot pedal for hands free operation available.

The VARIO 555eMA can also be equipped with the HADE CODETAPER[®] printing device which imprints tape with your custom message or code as the tape is dispensed. This in-line process improves productivity plus it identifies merchandise and helps to discourage in-transit pilferage.

Don't leave your carton sealing to chance. Go for quality and state-of-the-art technology!

VARIO 555 eMA

Electronic
Tape Dispenser

The HADE VARIO 555eMA handles both reinforced and paper tapes.

Secure, fast and neat carton sealing!

HOW THE VARIO 555eMA WORKS

The keypad contains 14 preset lengths allowing the operator to quickly choose the required length - simply with the push of a button.

The moistened tape at its precise length now will be cut and dispensed.

For serial demands of same sized tapes there is a large repeat key.

The random length key allows the operator to call any needed lengths.

Choosing the Automatic mode will make the machine automatically dispense up to 3 lengths in a row. Plus preset lengths can be adjusted using the special function keys "+", "-" and "x2".

The new VARIO 555eMA is an universal Gummed Tape Dispenser for all sealing applications.

- 1** Color coded user-friendly keypad for ease of operation, improved "soft-touch" tactile feel and durable performance.
- 2** Stainless steel tape path and steel side frames for added strength and longevity. Paper rolls up to 25cm (!) can be processed for fewer changeovers.
- 3** Larger water bottle capacity, plus new no-spill cap design for fewer refills, less downtime and no spills.
- 4** Improved, adjustable top heater ensures superior tape adhesion and performance. Plus, it's thermostatically controlled and low voltage - for safe long life operation and the use of an extensive variety of tapes.
- 5** Superior, three (3) brush wetting system ensures proper activation and wetting of tape adhesive.

OPTIONS

- Foot pedal
- CODETAPER ® for imprinting tape as it is dispensed
- AMD Automatic Measuring Device
